### BENEFITS

Eases single-use systems specifications with one-part number for both halves

Intuitive three-step connection process reduces risk of operator error

Audible confirmation of connection with no additional hardware required

AseptiQuik PPSU enables genderless connection for a greater range of chemical applications, offering versatile connections across downstream processes with a pH range from 2 to 12

AseptiQuik PPSU meets a broader range of Application Requirements

### TYPICAL FLOW RATE:

**Cv Value Range:** 1.5 - 31  
for AseptiQuik G

Cv values represent the approximate expected flow rate in gallons per minute of water at room temperature for a 1 PSI pressure drop. The flow is generally constrained by the smallest diameter, which in some cases will be the termination diameter and not the Nominal Flow Path.
